USING YOUR APPLIANCE

02

Before Use

1

Locate the back cover handle, then gently pull it to remove the back cover.

2

Remove all wraps and packaging from the filter.

3

Put the filter into the appliance as shown in the image above. Make sure that both straps are pointing outwards.

4

Make sure the filter is placed within the marked lines, then close the back cover.

5

Place the appliance on a flat, level surface. Keep it at least 38 cm/15 inches away from walls or any major obstacles.

6

Your appliance is now ready to use! Plug it into the power outlet, and press  to turn it on.

Control Panel

Power Button

- Turn power on/off.
- Long press for 10 seconds to reset factory settings.

Purifying Speed Button

- Adjust purifying speed across 1-3 levels & Turbo.
- Long press for 10 seconds to enable Turbo+ mode and increase purifying speed even further.

Timer Button

- Select to set a timer (0-12 hours)
- Long press for 5 seconds to start WiFi connection settings.
Note: The timer hour is shown on the LED display.

Auto Mode Button

- Purify and adjust purifying speed automatically based on air quality conditions.

Information Display Button

- Switch the information displayed on the LED display (Clean Air, PM2.5, Filter Life).
- Long press for 5 seconds to reset the Filter Life Indicator.

Sleep Mode Button

- Touch to purify the air at the most silent power setting.
- To exit sleep mode, press either  or .

Note:

Long press  and  for 10 seconds to enter Low Power Standby Mode and turn off WiFi. To exit, long press  for 5 seconds, and WiFi connection will restart.

LED Display

Constantly monitor the air quality in your room with the comprehensive and intuitive monitor display.

Note: You can turn off the LED display and lights in the DREO app.

Air Quality Indicator Light

Light Color	Air Quality Level
 Blue	Excellent
 Green	Good
 Orange	Moderate
 Red	Poor

Note: The Air Quality Sensor detects PM 2.5 particles but cannot detect odors. If you feel that the indoor air odor is relatively strong, it is recommended to manually open the highest purifying speed.

Additional Features

On/Off Timer

When the appliance is ON/OFF, touch the timer button repeatedly to set a timer (from 0-12H) for the appliance to turn ON/OFF.

Memory

If the appliance is turned OFF or disconnected from power, it will operate under the previous settings (except the Timer setting) when it is turned ON again.

Display Auto Off

Display turns off after 5 seconds in Sleep Mode or in low-light conditions.

Wake up the display with any button.

Firmware Update

Check the firmware version on the DREO app and update regularly for the appliance to work more efficiently.

Display will show "UP" during the update process.
Do not operate until the update is completed.

Child Lock

- Use the DREO app to activate / deactivate the Child Lock function.
- When activated, the display will show , and all the buttons on the appliance will be locked.

Getting the Most Out of This Appliance

1. Keep the doors and windows closed when the air purifier is on.
2. Do not block the air openings and keep away from curtains or walls.
3. Maintain and replace the filter on a regular basis for maximum efficiency.

CONNECTING TO YOUR APPLIANCE

03

Before connecting the appliance to your mobile device, please scan the QR code on the left or go to the app store and search “**DREO**”, then select and download the app.

Download on the
App Store

GET IT ON
Google Play

Look for “**Smart Air Purifier Macro Max S**” when connecting your new appliance.

You can use the DREO app to connect your appliance to **Amazon Alexa** or **Google Home**. Please follow the in-app instructions to set up your voice assistant.

NOTE: You must create a DREO account to access voice assistants.

- 1 Launch DREO and sign in or create account by following in-app instructions.
- 2 Enable Bluetooth on your mobile device and plug in your appliance.
- 3 Hold  for 5 seconds to start WiFi connection settings.
(Tip: The WiFi icon  will keep flashing when pairing.)
- 4 Tap+ **Add Device** and select **Smart Air Purifier Macro Max S**.
- 5 Follow in-app instructions to complete WiFi connection.
- 6 You're now ready to control the appliance on your app.
(Tip: To restart connection settings, hold  again for 5 seconds)

CLEANING AND MAINTENANCE

04

Replacing the Filter

The filter life is measured by the air purifier's algorithm which is based on the working mode, fan speed, run time, and indoor air quality. It's recommended to replace the filter every 6-8 months or when the Filter Life Indicator alerts.

1

The Filter Change Reminder will flash when the filter needs to be replaced. Turn off and unplug the air purifier.

2

Locate the back cover handle, then gently pull it to remove the back cover.

3

Remove the plastic packaging.

4

Remove the old filter, then put the new filter in place.

5

Make sure the filter is placed within the marked lines, then close the back cover.

6

Plug in the air purifier and long press  for 5 seconds until it beeps, to reset the Filter Change Reminder.

Cleaning the Inside & Outside

1

Unplug the air purifier before any cleaning and maintenance.

2

Remove the filter and clean the inside with a dust vacuum.

3

Wipe clean the housing with a dry, soft, non-abrasive cloth.

4

It is recommended to clean the Air Quality Sensor on the back with a dust vacuum at least every 3 months.

Cleaning the Filter

- For optimal use, the outer pre-filter can be cleaned with a soft, dry brush once every 2-4 weeks.
- Keep away from water and humid areas. Moisture will allow mold to grow.

Related to Filter

Where can I buy a new filter?

Please purchase directly from the DREO official website at www.dreo.com or through the DREO app.

I changed the filter, but the Filter Change Reminder is still on.

The Filter Change Reminder will not automatically reset. Please press and hold  to reset the reminder, the indicator will turn off after reset.

The Filter Change Reminder has not turned on for a long period of time.

There are several factors that can impact the filter life, including the indoor air quality level, length of operation and particle density in the air. If your room has a better air quality level and/or you don't use your air purifier often, the reminder will take longer to light up.

Related to Use

Why is my air purifier not working?

Check if the power is connected, the power cord is damaged, or the electrical outlet is powered.

The airflow from my air purifier is too weak.

- Make sure that there is enough space around the air purifier.
- Check if the filter packaging has been removed.
- Fan speed will be low when auto mode is switched on and air quality is good. Try to switch to higher speed.
- Replace the filter if the filter is clogged and overloaded.

My air purifier doesn't improve the air quality.

- Check if the filter packaging has been removed.
- Make sure the windows are closed as polluted air may continue coming in from outside of the windows.
- The overloaded filter will make the fan work harder to pass the air through. Consider replacing the filter if it is clogged.
- Do not place in crowded areas and corners.
- Check if air outlet and inlet are obstructed.

Why is my air purifier making a loud noise?

- Switch the air purifier to sleep mode or lower purifying speeds.

Why is the Air Quality indicator is always red?

- It's recommended to move the appliance to a different location, replug it, and check the indicator light again. If the issue persists, please contact our Customer Support.

The odor in the room is very strong, but the Air Quality Indicator is only green or blue.

- The Air Quality Sensor detects PM 2.5 particles but cannot detect odors. If you feel that the indoor air odor is relatively strong, it is recommended to manually open the highest purifying speed.

Why is the Air Quality indicator always blue?

- The Air Quality sensor reports the presence of airborne particles, but it cannot detect gas. Please make sure there is no gas contamination inside your room.

Why is my air purifier making an unusual noise?

- Make sure the air purifier is operating on a flat, stable surface.
- Do not add essential oils or diffusers into the air purifier or use in a excessively humid area. Humidity will cause mold to grow.
- If the unusual noise still exists, there may be external objects blocking the air openings. Please contact our customer support.

Why does my air purifier produce an unpleasant smell?

- During the initial few days, new air purifiers produce a plastic smell which is normal and will dissipate eventually.
- Do not add essential oils or diffusers into the air purifier or use in a excessively humid area. Humidity will cause mold to grow.
- If the filter has absorbed pollutants to its maximum capacity, then the smell may come from the dirty filter. Please replace the filter when necessary.

If your problem is not listed or still persists, contact our Customer Support (see page 13).
